

Course Competency Report by Code

Code: AGC1

Foundations of College Mathematics (AGC1)

Course of Study: AGC1 - Foundations of College Mathematics
Course Level: Undergraduate
Course Division: General Education
Discipline: Foundations
Course Type:
Department: AOS Mathematics

COMPETENCY #	COMPETENCY NAME	COMPETENCY TEXT
116.2.1	Applying Basic Numeracy & Calculation Skills	The graduate utilizes the operations, processes, and procedures of basic numeracy and calculation skills to solve quantitative problems in arithmetic and basic algebra.
116.2.2	Basic Algebraic Skills	The graduate applies the operations, processes, and procedures of basic algebra to solve quantitative problems.
116.2.3	Basic Geometric Principles	The graduate utilizes the operations, processes, and procedures of basic geometry and measurement to solve problems in mathematics.
116.2.4	Basic Data Interpretation & Probability	The graduate evaluates quantitative data by interpreting statistical and graphic representations and solves basic probability problems.
