

Course Competency Report by Code

Code: C107

Anatomy and Physiology I (C107)

Course of Study: C107 - Anatomy and Physiology I
Course Level: Undergraduate
Course Division: Lower Division Major
Discipline: Biology
Course Type:
Department: General Education

COMPETENCY #	COMPETENCY NAME	COMPETENCY TEXT
130.1.1	Fundamentals of Anatomy and Physiology	The graduate utilizes appropriate terminology to communicate about human anatomical features, body position, and chemical physiology.
130.1.2	Digestive System	The graduate evaluates the normal operation of the human digestive systems through an understanding of structure, regulation, and function.
130.1.3	Skeletal System	The graduate evaluates the normal operation of the human skeletal systems through an understanding of structure, regulation, and function.
130.1.4	Sensory Systems	The graduate evaluates the normal operation of the human sensory systems based on an understanding of structure, regulation, and function.
130.1.5	Respiratory System	The graduate evaluates the normal operation of the human respiratory system based on the understanding of structure, regulation, and function.
130.1.6	Reproductive System	The graduate evaluates the normal operation of the human male and female reproductive system through an understanding of structure, regulation, and function.
130.1.7	Nervous System	The graduate evaluates the normal operation of the human nervous system based on an understanding of structure, regulation, and function.
130.1.8	Muscular System	The graduate evaluates the normal operation of the human muscular systems through an understanding of structure, regulation, and function.
130.1.9	Cardiovascular System	The graduate evaluates the normal operation of the human cardiovascular system based on the understanding of structure, regulation, and function of heart and blood vessels.
130.1.10	Lymphatic and Immune Systems	The graduate evaluates the normal operation of the human lymphatic and immune systems through an understanding of structure, regulation, and function.
130.1.11	Integumentary System	The graduate explains the normal operation of the human integumentary systems through an understanding of structure, regulation, and function.
