Health Information Technology Project – C421

Overview

A medical group has decided to move forward with the organizational initiative of reducing health disparities, increasing access, and improving outcomes by leading a cooperative of local healthcare organizations in a Community Health Information Exchange System (CHIES) expansion plan founded on the governor’s vision to advance HIEs. You will complete an assessment of a CHIE, propose an updated Electronic Health Records System (EHRS), and complete a CHIE feasibility assessment.

Competencies

- **Data Application**
  The graduate evaluates the value, source, and appropriate application of the data (risk, compliance, quality, policy, populations, finance, economic factors).

- **Data**
  The graduate assesses a variety of analytical methods for advancing healthcare.

- **Health Technology/HIT**
  The graduate evaluates the challenges and opportunities in healthcare technology.

Learning

Getting Started

Welcome to Health Information Technology Project! This course encompasses three assignment topics: Preparing an HIT Recommendation, Developing New EHRS Strategies, and Assessing CHIE Feasibility. In each assignment topic, you will explore the "Discover" section, complete the "Engage" activities, and finish the assignment worksheet. Each assignment is designed to build your skills to help you complete the final project. Competency will be demonstrated by the successful completion of a performance assessment where you develop a health information technology strategic plan. There is also a Leadership Development component in the Project section. The completion of the Leadership Development activities will help you develop as a leader and a professional. To help you track your progress in the course, view the Pacing Guide located in the Course Information section. To get started, click "Go to Course Material".

Assessments

- **Performance Assessment: Health Information Technology Project**
  Status: Not Attempted
  Code: GGP1
