Overview

You will design a chronic care population management plan and change a health system's model to one that focuses on patient and family. You will review a model from Mississippi that has expanded Medicaid where the opportunities to develop partnerships are ideal. To help control costs, you will develop a wellness and prevention program alongside the disease management model already being used in a system of their choice.

Competencies

- Fiscal
  The graduate applies fiscal management principles and strategies in healthcare using a variety of tools to promote organizational sustainability and productivity.

- Data
  The graduate assesses a variety of analytical methods for advancing healthcare.

- Data Application
  The graduate evaluates the value, source, and appropriate application of the data (risk, compliance, quality, policy, populations, finance, economic factors).

Learning

Getting Started

Welcome to Population Management and Care Coordination Project! This course will assess your competency by having you complete a performance assessment where you develop a Chronic Care Population Health Initiative. To help you track your progress in the course, view the Pacing Guide located in the Course Information section. To get started, click “Go to Course Materials.” This course encompasses three assignment topics: Assess Population Need, Advance Patient Care, and Strengthen Sustainability. In each assignment topic, you'll explore the Discover Section, complete the Engage activities, and finish the project worksheet. Each assignment is designed to build a final evaluation report. There is also a Leadership Development component in the Project section. The completion of the Leadership Development activities will help you develop as a leader and a professional.

Assessments

Performance Assessment: Population Health Management

Status: Not Attempted
Code: GIP1
