Integrated Healthcare Management Capstone Project – C433

Overview

The capstone project is a student-designed project intended to illustrate your ability to effect change in the industry and demonstrate competence in all five core competencies of the curriculum. You are required to collaborate with leaders in the healthcare industry to identify opportunities for improvement in healthcare, propose a solution, and perform a business analysis to evaluate its feasibility. In addition, the capstone project encourages work in the healthcare industry that will be showcased in your collection of work and help solidify professional relationships in the industry.

Competencies

- Capstone
  
The graduate integrates and synthesizes competencies from across the degree program and thereby demonstrates the ability to participate in and contribute value to the chosen professional field.

Learning

Getting Started

Welcome to the Integrated Healthcare Management Capstone Project! Competency in this course will be demonstrated by the successful completion of a performance assessment consisting of four tasks: a prospectus, a business plan, a multimedia presentation, and the activities associated with My Leadership Plan.

To help you track your progress in this project, view the Pacing Guide located in the Course Information section.

Assessments

Performance Assessment: Integrated Healthcare Management Capstone
Status: Not Attempted
