Overview

The Data Analytics Graduate Capstone course allows the student to demonstrate their application of the academic and professional abilities developed as a graduate student. The capstone challenges students to integrate skills and knowledge from several program domains into one project.

Competencies

Capstone

The graduate integrates and synthesizes competencies from across the degree program, thereby demonstrating the ability to participate in and contribute value to the chosen professional field.

Learning

Getting Started

You are one course away from completing your degree! The capstone is a culmination of your work and experience up to this point. This course requires the completion of a capstone prospectus, a capstone report, and a multimedia presentation; this is your performance assessment.

The following steps mark progress through the capstone experience:

1. Develop a prospectus for your project.
2. Submit prospectus for grading.
6. Submit the presentation for grading.

Select the “Go to Course Materials” button to begin the coursework.

All necessary templates, waivers, and forms are also accessible for download within your assessment. Select Preview to access the assessment. Capstone course mentors and your capstone evaluator are available to help guide you.

Note: Use the Data Analytics Lab Sandbox link located within the Course Information section below. This link will take you directly to the MSDA Program lab environment.
