Cybersecurity Graduate Capstone – C796

Overview

The Master of Science in Cybersecurity and Information Assurance (MSCSIA) Capstone project allows students to demonstrate their capability to establish a durable cybersecurity and information assurance program. The capstone project challenges students to integrate skills and knowledge from all program domains into one project that deals with a significant real-world cybersecurity problem. This course aggregates content from earlier courses to help students prepare for the CISSP certification exam.

Competencies

~ Capstone

The graduate integrates and synthesizes competencies from across the degree program, thereby demonstrating the ability to participate in and contribute value to the chosen professional field.

Learning

Getting Started

You are one course away from completing your degree! The capstone gives you the opportunity to showcase the knowledge and experience you have earned throughout your degree program. This course is designed to support your efforts as you work through the capstone project requirements. Competency will be demonstrated by the successful completion of a performance assessment, which is the capstone project. All necessary templates, waivers, and forms are available for download within your assessment tasks. Capstone course instructors and your capstone evaluator are available to guide you.
