Managing Information Security – C843
Course Feedback

Overview
This course expands on fundamentals of information security by providing an in-depth analysis of the relationship between an information security program and broader business goals and objectives. Students develop knowledge and experience in the development and management of an information security program essential to ongoing education, career progression, and value delivery to enterprises. Students apply best practices to develop an information security governance framework, analyze mitigation in the context of compliance requirements, align security programs with security strategies and best practices, and recommend procedures for managing security strategies that minimize risk to an organization.

Competencies

△ Information Security Governance
The graduate recommends modifications to established information security governance to increase information assurance levels within an organization.

△ Threat & Vulnerability Management
The graduate recommends risk mitigation strategies that meet regulatory and ethical compliance.

△ Information Security Management
The graduate recommends changes to established security management programs in response to a cyber-related incident on an organization.

△ Incident Response
The graduate develops security incident response plans that align to an organization’s security goals and objectives and maintain business continuity.

Learning
Getting Started

https://my.wgu.edu/courses/course/9420002
Welcome to Managing Information Security! This uCertify course contains reading materials, video case studies, and interactive knowledge checks. Complete each lesson, then take the lesson quiz to check your understanding. Competency in this course will be demonstrated by the successful completion of a performance assessment. The pacing guide, included in the welcome section of the course, provides a suggested weekly plan for working through the lessons in a timely manner.

Assessments

Performance Assessment: Managing Information Security

Status: Not Attempted
Code: KOP1
