  The graduate analyzes characteristics of cloud services.

- **Cloud Computing and Business Value**
  The graduate explains how cloud computing impacts business value.

- **Technical Perspectives / Cloud Types**
  The graduate outlines types of cloud computing, the associated risks, and technical impact.

- **Steps to Successful Adoption of Cloud Computing**
  The graduate outlines the steps to successful adoption of cloud services.

- **Impacts and Changes of Cloud Computing on IT Services Management**
  The graduate assesses the impact of cloud computing on IT service management.

- **Risks and Consequences of Cloud Computing**
  The graduate evaluates the risks involved in the use of cloud services.
Welcome to Cloud Foundations. Cloud computing has become a popular phrase in business organizations and the IT industry; it is used in a variety of ways from software marketing to describing network services. In this course, you will examine the use, impact, and security issues of working in the cloud.

This course employs uCertify learning resources that contain the necessary reading materials and knowledge checks needed to prepare you for the course assessment, CompTIA's Cloud Essentials certification exam (CLO-001). For the best understanding of the course content, complete each lesson. To help you track your progress, we suggest you follow the pacing guide identified at the beginning of the course.

Your competence will be demonstrated by the successful completion of CompTIA's Cloud Essentials certification exam (CLO-001). Select the "Go to Course Material" button to begin.
