Overview

You will develop a value-based payment model and strategic implementation plan to provide high-quality, most cost-effective care to a high-risk patient population. The organization is currently not equipped to take on the risks inherent in the population of Southern Florida. To create a successful plan, you will analyze and interpret data to determine the population's need and justify that their organization can financially support and sustain the new system.

Competencies

▲ Leading Change
The graduate proposes solutions using effective strategies and processes to lead change.

▲ Fiscal
The graduate applies fiscal management principles and strategies in healthcare using a variety of tools to promote organizational sustainability and productivity.

▲ Data Application
The graduate evaluates the value, source, and appropriate application of the data (risk, compliance, quality, policy, populations, finance, economic factors).

Learning

Getting Started
Welcome to Healthcare Financial Management Project! This course encompasses three assignment topics: Financial Benefits of PHM, Assessing and Sharing Financial Risk, and Developing Implementation Strategies. In each assignment topic, you will explore the “Discover” section, complete the “Engage” activities, and complete the assignment worksheet. Each assignment is designed to build your skills to help you complete the final proposal. Competency will be demonstrated by the successful completion of a performance assessment where you develop a value-based payment model and strategic implementation plan. There is also a Leadership Development component in the Project section. The completion of the Leadership Development activities will help you develop as a leader and a professional. To help you track your progress in the course, view the Pacing Guide located in the Course Information section. To get started, click "Go to Course Material".
Status: Not Attempted
Code: LQP2
