Software Development Capstone – C868

Overview

The capstone assessment challenges students to demonstrate mastery of all the BSITSW program outcomes. Students will develop a software application to solve a problem of their choice constrained only by the technology requirements provided in the assessment DRF.

Competencies

Capstone

The graduate integrates and synthesizes competencies from across the degree program, thereby demonstrating the ability to participate in and contribute value to the chosen professional field.

Learning

Getting Started

Welcome to the Software Development Capstone! You are one course away from completing your degree. The capstone is a culmination of your work and experience up to this point. This course requires the completion of the design, development, and implementation of a software application; this is your performance assessment. All necessary templates, waivers, and forms are also accessible for download within your assessment. Select “Preview” to access the assessment. Capstone course mentors and your capstone evaluator are available to help guide you. There is no learning resource for this course, however the following material will help you complete your capstone project.

Select the “Go to Course Materials” button to begin the coursework.

Assessments

Performance Assessment: Software Development Capstone

Status: Not Attempted
Code: EZP1
