Enterprise Risk Management – C986

Overview

Enterprise Risk Management provides an opportunity to examine risk exposure, and response, and risk mitigation within an integrated care delivery model. Students will apply practices to identify risks and develop sustainable corrective action plans. This course has no prerequisites.

Competencies

- Basic Principles of Enterprise Risk Management
  The graduate assesses risk, types of risk, the role of stakeholders, and the principles and approaches to minimize healthcare organizational risks.

- Enterprise Risk Management
  The graduate assesses operational, ethical, governance, regulatory, legal, and financial factors in healthcare that manage, mitigate, exacerbate, and shift risk.

- Innovative Solutions
  The graduate develops innovative solutions that use various models to address future challenges and emerging opportunities in the healthcare industry.

- Influences on Quality Improvement
  The graduate evaluates a healthcare leader’s role in quality improvement to determine the situational, environmental, economic, and regulatory factors within a healthcare organization.

- Data Quality and Security
  The graduate explains how laws, standards, tools, techniques, and procedures are used to maintain data quality and security within an administrative healthcare environment.

Learning
