Navigating Care Across the Continuum concentrates on how services are used to promote general well-being, resolution of physical and/or behavioral issues, and palliative and chronic care. The course will prepare students to evaluate barriers to providing the continuity of care and ways to resolve or navigate through these barriers. The course focuses on how historical factors play a role in how care and treatment are adjusted to meet the current needs of an individual, group, or population in a variety of care settings. There are no prerequisites for this course.

Competencies

- **Client Family-Centered Relationships**
  The graduate applies relationship-building skills that center on the client’s family, incorporating models of engagement and effective communication strategies to enable cooperative care.

- **Care Planning and Service Delivery**
  The graduate applies principles and strategies of patient care planning and service delivery, while incorporating appropriate care delivery models and treatment approaches, for patients with various levels of health and wellness in order to support optimal patient care and satisfaction.

- **Custom Interventions**
  The graduate applies customized technology-driven interventions based on patient characteristics, conditions, and intervention duration to enable optimal care.

- **Application of Case Management**
  The graduate applies case management models and referral practices for patients with various levels of health and wellness to provide optimal care.

- **Analyzing Assessments with EBP**
  The graduate applies assessments, using evidence-based practice (EBP), in the care and service coordination of patients with various levels of health and wellness.

- **Information Technology and Security**
  The graduate analyzes principles of information integrity and security, including any differentiation for clients with various levels of health and wellness, in order to maximize information security and patient privacy.

- **Application of Regulations**
  The graduate applies regulatory, compliance, and reimbursement guidelines based on best practices for specific client populations to support positive outcomes.
Welcome to Navigating Care Across the Continuum! The course focuses on how historical factors play a role in how care and treatment are adjusted to meet the current needs of an individual, group, or population in a variety of care settings. When you are ready to begin the course, select the “Go to Course Material” button to access the course content and learning resources. Each course topic will be included via the course’s learning platform. A pacing guide is provided as a suggestion for weekly goals and time management. Your course instructor will inform you how best to schedule time for reading and coursework, help you prepare for the pre-assessment, and provide feedback on your progress. Competency will be demonstrated by the successful completion of an objective assessment.
