Instructional Design Production – JPT2

Overview

Instructional Design Production focuses on the application of a systematic process of instructional design, namely the concepts and procedure for analyzing and designing successful instruction. This course will prepare students to conduct a goal analysis, a process used to identify instructional goals, as well as a task analysis, which is used to determine the skills and knowledge required to accomplish those goals. This course also focuses on writing performance objectives, designing assessments, and developing instruction that incorporates relevant learning theories. Methods for formatively evaluating a unit of instruction are also introduced. There are no prerequisites for this course.

Competencies

- **Scope and Sequence**
  The graduate develops a logical scope and sequence for an education program and formulates appropriate and measurable program objectives.

- **Learning Theories**
  The graduate explains how different learning theories apply to an instructional setting.

- **Instructional Strategies**
  The graduate applies knowledge of learning theories when selecting instructional strategies that will best assist in the learning process.

- **Learning Assessment**
  The graduate facilitates the development of a variety of techniques to assess learning.

- **Design of Curriculum Unit**
  The graduate designs an appropriate unit of instruction.

Learning

Getting Started

Welcome to Instructional Design Production! During this course you will apply your knowledge of the instructional design process to create a unit of instruction. The course will walk you through each step of the process, including conducting a task analysis, writing performance objectives, developing assessments, planning your instructional strategy, writing lesson plans, and evaluating your unit. This course is delivered in WGU’s module-based learning platform, which incorporates textbooks, articles, videos, and a variety of other learning components. We encourage you to engage in the interactive components (like learning checks) to remember and practice what you are learning. Your competency will be demonstrated by completing a performance assessment. The "Connection to Assessment" sections of the course, the provided templates, and your course mentor will guide you as you prepare your materials for submission.

Assessments

- **Performance Assessment: Instructional Design Production**
  Status: Not Attempted
  Code: JPT2
